

# Colocation

Get connection quality, speed, and security without having to maintain your own infrastructure.

Wholesale Colocation gives you the ability to lease space, power, and bandwidth in one of our POPs (Points of Presence), which are all environmentally conditioned and securely maintained by us. You can install your own voice and or data networking equipment to obtain wholesale voice and data connections into our networking infrastructure. Colocation is available in cage or rack/cabinet configurations.

## Benefits

- Ability for the customer to install their equipment in a secure facility that is environmentally maintained
- Eliminates the need for customers to build and maintain their own infrastructure
- Enables customers to pay for what they need and scale the services/bandwidth as their business demands
- Access to high capacity bandwidth directly into our network
- Remote hands are available and are billed on a time and materials basis

## Features

- Full cabinet/cages
- First 20 amps of AC power included  
Additional power available in 5 amp increments
- DC power available for an additional charge
- Fiber connectivity
- Back-up power
- Key card access and indoor/outdoor video surveillance
- HVAC temperature/humidity control
- FM 200 fire suppression system
