

Private Line

Our network provides key access to POPs, carrier hotels and business centers with diversified access to multiple carriers.

LATA	Market
721	Las Vegas
722	SF, Oakland, San Jose
726	Sacramento
728	Fresno
730	LA, Irvine
732	San Diego
734	Bakersfield
738	Stockton

Local and Inter-city Private Line Service is dedicated bandwidth between LATAs, cities, buildings, across our reliable SONETbased, self healing network. It's the right choice for businesses that need secure communications.

Private Line Local: Your first choice for the last mile

TelePacific offers private line service throughout its California and Nevada markets. DS1, DS3, and OCn links are all available. Private Line Local allows you to extend your customer reach.

Known for the dependability of our network and our people, we can provide the stability you need. Inter-exchange carriers and ISPs that need to expand service areas and connect to customers or to a LEC central office use Private Line Local. Our network provides key access to POPs, carrier hotels and business centers within major metropolitan areas.

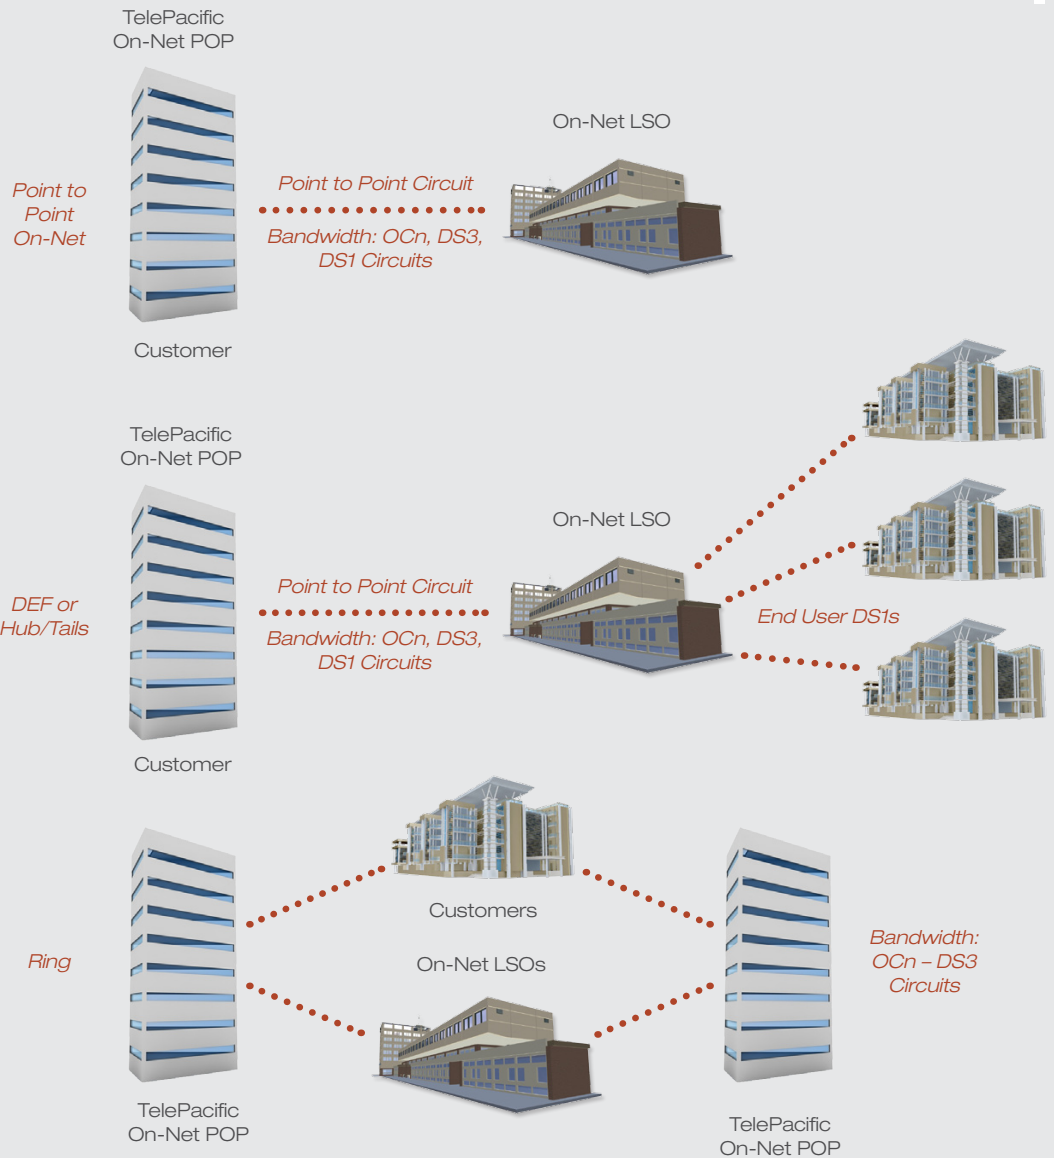

Service providers that would like to connect multiple locations within a local area (interLATA) need Private Line to create private networks while giving you the high bandwidth, security and redundancy you need.

Private Line Inter-city: Yes the network matters when you connect locations and grow markets

TelePacific's Private Line Inter-city provides dedicated bandwidth throughout California and Nevada, and lets you connect locations in many different LATAs and regions including, connecting you between Los Angeles and Las Vegas, quickly and efficiently. And if all of your locations are on our network, you'll benefit by eliminating multiple vendors. Whether you are a carrier or ISP, high quality bandwidth is a priority. We'll get you connected fast whether you need LPL, IPL, or both.
